WANTED: Math Monster

NEWS FLASH!! A monster has been spotted roaming the halls of our elementary school. The problem is only brief glimpses have been captured so no one is sure what the monster looks like - EXCEPT you!! On your way to our room, you got a good look at the monster. Your help is needed immediately. You need to draw a composite sketch so that everyone will know what the monster looks like so that we can apprehend the suspect for questioning. Your drawing could lead to a break in the case! Get going by following these directions:

1. On your paper, draw the geometric monster. It must include at least 13 of the following items (check off the terms as you use them.) You must label the terms on your monster too.

2 points for each term drawn and labeled

- _____ line
- _____ line segment
- _____ ray
- _____ obtuse angle
- _____ acute angle
- _____ right angle
- _____ parallel lines
- _____ perpendicular lines
- _____ rhombus
- _____ quadrilateral
- _____ square
- _____ rectangle
- _____ kite
- _____ trapezoid
- _____ polygon

2. You must color your monster. **5 points for color**
3. It must be neat. **2 points for neatness**
4. Bonus points for creativity - Add words to your poster that describe the monster, give it a name, or provide reward money, or ?? Have a little fun! **3 points for creativity**
